

Appendix. Student focus group questions

Questions

What past experiences have you had in IPE or team-based care?

What aspects of the care for the participants were most amenable to team-based care?

What aspects of the care for the participants were least amenable to team-based care?

How would the care have been different if the participants had been cared for individually instead of as a team?

How do you think the high-intensity gait training sessions went?

In your exposure to nursing and physical therapy students, what did you learn that was new or surprising?

What do they think this project could look like in the future?
